

# WOMEN4IT

Project no. 2017-1-094

## WOMEN4IT PROJECT

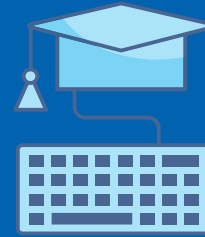

Women4IT is a multi-stakeholder partnership funded by the EEA Grants and the Norway Grants Fund for Youth Employment.

The project is developed by 9 partners from across Europe and the Irish Computer Society is the Irish partner in the project.

The aim of women4IT is to get young women into the digital/IT sector, through a training programme with the final goal of employment.

## HIRE ONE OF OUR SKILLED GRADUATES!

Our graduates are young female talents eager to find their next career challenge! We are looking to secure a 4 month paid internship with companies willing to make a difference in the workforce.

Here are the 4 job profiles available:

Data Analyst

Graphic Designer

Digital Media Executive (QQI 5)

Junior Web Developer

Our graduates may be the perfect match for your company!

## WHY HIRING FROM WOMEN4IT?

Women4IT could be the hiring solution you need!

- We facilitate the job matching process. We have mentored the young women throughout their entire journey, we got to know their motivations, their soft and technical skills.
- You know what they have been trained for, which software or topic they studied during their course, attesting of their knowledge and abilities
